7 MS. STOCKMAN: My name is Cora Stockman.

8 C-O-R-A, S-T-O-C-K-M-A-N.

9 I'm a Registered Nurse and I would like to go

10 on record opposing nuclear waste being stored at Yucca

11 Mountain. I feel that transportation is a public

12 health issue. My understanding is that the nuclear

13 waste will be transported through 43 states and they

14 haven't shown scientific proof that this is safe.

15 Also, I'm concerned about contamination of the water

16 supply as well as the surrounding area at Yucca

17 Mountain. Again, the DOE hasn't proven, hasn't given

18 us any proof, scientific proof, that this is safe. I

19 understand that millions of dollars have gone into this

20 project, but I feel the lives of people are worth more

21 than that. Thank you.
